1. Generalities:

Product was found stockpiled at Warehouse J. Repullo N°1484, located at Talcahuano, Chile. Cargo was stored in bulk to be stuffed into containers.

Stuffing Start	:	On May 15, 2026, at 08:00 Hrs.
Stuffing Term	:	On May 15, 2026, at 15:25 Hrs.

2. Product Inspection:

Cargo visual inspection and warehouse supervision were carried out prior to commence stuffing operation into container, cargo was noted clean and free of contaminants of any kind.

3. Stuffing of product:

Stuffing Operation was carried out into warehouse in a designated place for the activity.

Cargo loading and stuffing into container was carried out assisted by an equipment previously inspected to rule out dirt, humidity, or leaks of any kind.

Visual inspection of the containers was carried out to check their cleanliness and physical condition, where no observations were recorded.

After weighing each container in the shore scale, each one was sealed, installing the seal assigned by carrier and the **ALS** seal on the door.

3. View container lateral side, in inspection process.

4. Another view lateral panel in inspection process.

5. View Carrier seal Nr. LAB480705 on container.

6. General view of sealed container.

4. Product Weighing:

To weigh the cargo, the container loaded on the truck was weighed at the shore scale property of Fullcargo SPA. The net weight of the cargo was calculated by weighing difference.

Shore Scale calibration date is reviewed, which data from April 26, 2026, carried out by company Molinstec SPA.
